PROJECTS

CRUD Operation Project

- Developed a responsive To-Do List app using JavaScript, HTML, and CSS, focusing on simplicity
    and usability.
- Implemented task management features: adding, deleting, and marking tasks as complete.
- Integrated local storage to persist user tasks, allowing data to be retained across browser sessions.
- Designed a clean and modern UI with CSS Flexbox and custom styles for intuitive task handling.
- Ensured user interaction through intuitive hover effects and task completion toggling with a strikethrough visual indicator.

Recipe Search App

- Developed a responsive Recipe Search App using HTML5, CSS3, and JavaScript.
- Integrated TheMealDB API to fetch and display recipe data dynamically, allowing users to search and explore a variety of recipes.
- Implemented a user-friendly interface with clean UI/UX principles to enhance the search and browsing experience.
- Enhanced usability by enabling users to filter recipes based on ingredients, meal type, and region.
- Utilized asynchronous JavaScript (AJAX) for smooth and fast API requests, ensuring a seamless user experience without page reloads.

To-Do List App

- Developed an interactive To-Do List application using JavaScript, HTML, and CSS.
- Enabled task addition, deletion, and completion toggling with real-time updates.
- Utilized local storage to persist tasks and their completion status, ensuring data is retained across page reloads.
- Designed a responsive user interface with CSS Flexbox and custom styles for an intuitive user experience.
- I implemented dynamic task management features, such as marking tasks as completed with a strikethrough effect and allowing easy removal of tasks.
